

AUDIO SOURCE IDENTIFICATION

ABSTRACT

In one embodiment, a method is provided. The method of this embodiment may
5 include issuing and/or receiving one or more signals encoding audio information and/or
an identification of a source of the audio information. The audio information may be
generated, at least in part, at the source. The identification may be generated based, at
least in part upon, identifying information provided at the source. Of course, many
alternatives, variations, and modifications are possible without departing from this
10 embodiment.
